MERE

nudge

Freshness, remembered

A one-touch food tag that helps people remember they have stored food before it gets forgotten.
Press the center button, attach it to a container or bag, and check the LED display to see how long the food has been stored. The day count and color indicators make it easier to prioritize what to eat next.

THE PROBLEM

Food disappears when it is out of sight.

Most solutions require too much effort for everyday use.

30 – 40 %
of U.S. food goes uneaten
(United States Environmental Protection Agency)

1 in 3
People forget leftovers once they are out of sight
(New York Post)

THE SOLUTION

Green – Fresh
Day 1- 3

Yellow – Consume Soon
Day 4- 7

Red – Spoiled
Day 8 - 10

nudge makes stored food visible at the moment of decision.

One-touch activation
- User presses the center button to start tracking
- No setup, no app input, no configuration required

Time-based freshness indicator
- Automatically tracks how long food has been stored
- Visual LED feedback communicates status instantly

Light cues when the fridge opens

Modular accessory ecosystem
- Compatible containers, silicone sleeves, and bags
- Built-in tag slot for easy attachment and removal

Smart notifications (key moments only)
- Alerts sent at critical decision points:
  Day 5 → “Consume soon”
  Day 8 → “Spoiled”
- Reduces over-notification while maximizing impact

THE BRAND

A lifestyle reminder system for the modern kitchen
- Premium food-care product, not a basic timer
- Designed to stay visible without feeling technical
- Uses gentle reminders to help users check stored food
- Connects the tag, accessories, and phone alerts into one simple system
